Medical and Aesthetics

PUREHYDRO

8 in 1 Hydrating Oxygen Facial

PurePeel • Oxygenation • Exfoliation • Skin Tightening • Lifting • Product Infusion • Fire & Ice

PURE PEEL

Removes debris from pores with painless suction. Uncover a new layer of skin with gentle exfoliation, utilising a combination of three solutions to cleanse and smooth the skin, offering a prescriptive approach to your customers concerns.

PURE OXYGENATION

PureGlo allows oxygen to be drawn into the skin. A reaction occurs between the capsule and the active ingredients used causing minute carbon dioxide bubbles on the skin. This increase in carbon dioxide levels induces a release of oxygen, the active ingredients containing Kojic Acid and Retinol result in a hydrating and brightening effect.

This reaction creates the Bohr Effect

PURE OXY SERUM SPRAY

Designed to nourish your skin and promote collagen growth. It involves spraying highly concentrated molecules of oxygen into the epidermis. The oxygen that's applied to your face and neck is infused with vitamins, minerals, essential nutrients, and botanical extracts.

PURE FIRM

Utilising microcurrent, often referred to as a "natural" facelift, reduces fine lines and wrinkles, while firming your skin and defining your features. Improve muscle tone, reduce puffiness, increase cellular activity and tighten pores.

PURE LIFT

Radio Frequency technology is used to increase collagen reproduction and skin tightening, resulting in collagen and elastin production.

PURE INFUSE

Ultrasound Technology with 100-300 million vibrations per second, infusing product at the same time. Choose from our range of serums dependant on your clients skin concerns.

PURE FIRE & ICE

The cooling and heating system allows to contract and expand pores. Heat is used at the start of the application to open the pores, increase blood supply, and aid product infusion. Cryo uses cooling technology, chilling the skin down to 0C. This is used at the end of the treatment to decrease the blood supply, resulting in a tightening effect, and sealing in the infused products.

PURE MASSAGE

Circular movements to help with lymphatic drainage and product infusion when combined with the PureGlo.

The Benefits of choosing PUREHYDRO

- 8 Technologies in one affordable device
- Two of the most popular treatments in one machine
- Affordable
- Low start up costs
- Low consumables
- Can treat all skin types
- Easy to operate

Calculations based on 3 treatments carried out per day, 5 days, 1 month (4 weeks) and over 52 working weeks. Cost to clinic not included in above figures, but can be provided on request. Based on average price per treatment.

PureHydro has high-resolution software, it is possible to pre set each treatment.

PURE Skincare can be used in conjunction with PureHydro treatments, both in salon and at home, providing a fantastic upsell opportunity.

"Working with PureSkin has helped to take our clinic to the next level. We included PureSkin in our selection process and once again they have left their competitors standing. We will be taking delivery of our second ReShape! The PureSkin team are so easy to work with. We always feel very supported, nothing is too much trouble. Working with PureSkin has been fantastic for us and I highly recommend them."

Penny Davis, DPC Clinic Cheadle

"Coming together is a beginning, keeping together is progress, working together is success"
